

	2022	2023	2024	2025	2026
Research		aim 1. parametric models	aim 2. nonparametric models		aim 3. tensor data integration
		non-convex optimization with accuracy gaurantees			neural network algorithm
		application to imaging	application to social network sciences		application to genomics
Education			develop new course on data sciences		create online courses
	online tutorial		diversity and inclusion in education		students' career development
			host undergraduates for summer research		presentation at IFDS, Data Hub
Social Impact			build system for multimodal data analysis		build data-driven prototypes
			develop cloud-based collaboration tools		release free software
		disseminate research outcomes in academic conferences and public lectures
